

CAPABILITY STATEMENT

Engineering | Fabrication | Procurement | Supply — Serving Western Australia

34+

Years Combined Experience

6+

Industries Served

**Mining &
NPI**

Key Sectors across WA

**On-Time
On-Budget**

Delivery Approach

COMPANY OVERVIEW

BD Industro Pty Ltd is a Western Australian industrial supply and engineering company specialising in procurement, custom engineering design, precision fabrication, drafting, and the supply of structural, mechanical, plumbing, and electrical components. We serve the mining, oil & gas, non-process infrastructure (NPI), industrial, commercial, and residential sectors.

Our co-founders bring over 34 combined years of hands-on experience in project controls, estimating, design engineering, manufacturing, and construction — across Australia, Asia, and the Middle East. This depth of expertise makes BD Industro a reliable, responsive, and technically capable partner for projects of any scale.

CORE CAPABILITIES

Engineering & Custom Design

Tailored, compliant engineering solutions designed for performance and efficiency. We develop fit-for-purpose designs that meet Australian standards and client specifications.

Procurement & Supply

Reliable sourcing and delivery of quality structural, mechanical, plumbing, and electrical components. We leverage strong supplier relationships to deliver on time and within budget.

Drafting & Documentation

Accurate technical drawings and fabrication-ready CAD documentation for seamless project execution. We transform concept designs into fully detailed shop drawings.

Fabrication & Project Support

Precision steel and metal fabrication with coordinated project assistance from design through to site-ready delivery. Custom structures built to exact client specifications.

SECTORS SERVED

Mining & Resources

Open-cut, underground, and processing facility support

Oil & Gas

Structural and mechanical components for upstream and downstream

Non-Process Infrastructure

Site offices, amenities, ROM walls, conveyor support

Industrial

Manufacturing plants, warehouses, and heavy industry

Commercial

Structural steelwork and supply for commercial builds

Residential

Custom metal fabrication and supply for residential projects

WHY CHOOSE BD INDUSTRO

- End-to-end capability: design, draft, fabricate, supply
- Deep expertise in WA mining and NPI sectors
- Precision CAD drafting from client-supplied drawings
- Custom metal structures built to exacting specifications
- Trusted partner to MACA Mining and other leading contractors
- On-time, on-budget delivery record
- Experience across Australia, Asia, and the Middle East
- Responsive service and direct access to founders

REPRESENTATIVE PROJECTS

Piping Spool Fabrication	Custom piping spool fabricated to specification for industrial/mining application, site-ready and compliant.
40' Container ROM Wall	Designed and fabricated ROM (Run of Mine) retaining walls integrating a 40-foot shipping container, delivered to mine site.
Movable Conveyor Crossover	Engineered and fabricated relocatable conveyor crossover for mining operations, designed for safety and ease of repositioning.
CAD Drafting — Quality Engineering	Transformed concept designs into fabrication-ready CAD drawings for metal structures across multiple project sizes.

MANAGEMENT TEAM

Mahfuzul Hoque — Co-Founder

10+ years experience in Project Controls, Estimating, Procurement, and Management Accounting within mining and civil construction. Expert in project delivery and cost optimisation.

M Shoaib — Co-Founder

24 years experience in design engineering, manufacturing, and construction. Worked across Australia, Asia, and the Middle East. Extensive knowledge of engineered custom fabrication and project delivery.
